## EDUCATION

**Allenhouse Business School**

*Bachelor of Computer Applications (BCA) – Final Year*

Kanpur, Uttar Pradesh

*Expected 2026*

## TECHNICAL SKILLS

**Languages:** Python (Advanced), JavaScript (ES6+), HTML5, CSS3, SQL (MySQL/SQLite)

**Frameworks:** Flask (Blueprints/SQLAlchemy), React.js, Tailwind CSS, Tkinter, Bootstrap

**Tools:** Git, GitHub, VS Code, Postman, Render, Netlify, Vercel, Figma

**Libraries:** OpenCV, Pandas, FFmpeg, RESTful APIs, MVC Architecture, Automation

## EXPERIENCE & LIVE DEPLOYMENTS

**Freelance Full-Stack Developer**

Kanpur, India

*Self-Employed*

*2024 – Present*

- **In.dl SaaS Platform:** Architected a credit-based Instagram media downloader SaaS using Flask and FFmpeg. Integrated payment gateways and user authentication for premium access.
- Deployed 3+ production apps to Render/Netlify, ensuring 99.9% uptime and mobile responsiveness.

**Web Developer (Academic Projects)**

Kanpur, India

*College Level Projects*

*2023 – 2024*

- Developed scalable web solutions focusing on backend efficiency and clean UI/UX.
- Collaborated on database schema design for high-performance data retrieval.

## KEY PROJECTS

**Obito AI Assistant** | *Python, OpenCV, Automation*

- Developed a voice-activated personal assistant with wake-word detection and system automation capabilities.
- Integrated face recognition security using OpenCV to authenticate users before executing commands.

**The Tongue Taste** | *HTML5, CSS3, JavaScript, Animations*

- Designed a modern, responsive restaurant website with immersive food imagery and smooth scroll animations.
- Optimized frontend performance achieving high Lighthouse scores for accessibility and SEO.

**TimeJet Desktop Widget** | *Python, Weather API, GUI*

- Engineered a real-time desktop widget displaying live weather data and personalized greetings via API integration.
- Implemented non-intrusive GUI logic to run efficiently in the background.

**Baba Car Bazar** | *Web Development, Responsive Design*

- Created an automotive marketplace website featuring a responsive catalog for car listings.
- Focus on cross-browser compatibility and fast load times for mobile users.

**MadAsGalaxyClock** | *Python, Tkinter, UI Design*

- Built a Sci-Fi inspired desktop clock with complex rotating animations and glowing visual effects.

## CERTIFICATIONS & ACHIEVEMENTS

**Hackathon Participation:** Active participant in college-level coding hackathons.

**Open Source:** 12+ Public Repositories on GitHub with 500+ contributions.
